Forecast for Saturday 27 Mar 2021

Weather: A cold, frosty start for most areas with a few lingering snow showers but otherwise bright and often sunny. Sunshine will turn hazy through afternoon ahead of outbreaks of rain (snow above 600m, rising to Munro level by midnight) spreading eastwards on strengthening winds.

Chance of cloud free mountain/hill tops above 800m: 50% around dawn, soon increasing 90%. Falling to 20% from the west from late afternoon.

Visibility: Away from any light snow showers through morning, and as areas of cloud around 400-500m lift and break, visibility will be excellent. Very little cloud expected below summit level until cloud lowers widely from the south and west later, generally to 500-700m. Best shelter across northern foothills of the Cairngorms and Monadhliath mountains.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View

Feeling bitterly cold on highest ground in the strong winds. Winds increasing to 80 or 90mph across the Cairngorm Plateau after dark.

Forecast for Sunday 28 Mar 2021

Weather: Heavy overnight rain and summit snow will clear eastwards to leave a bright or sunny morning with only the odd passing shower. Best conditions expected through morning as milder air spreads from the southwest through afternoon to bring widespread cloud and some rain (falling as snow above 900m at first), especially across the western ranges. The Cairngorms will stay drier, especially northern and eastern parts.

Maximum wind: West or southwest 40-50mph gusting 60-70mph at first, easing a little through morning.

Chance of cloud free mountain/hill tops above 800m: 80% falling to 20% through afternoon.

Visibility: Excellent through morning with distant views on offer but some areas of cloud are likely above around 700m. These will thicken and lower through afternoon as milder air arrives, with bases falling to 500m or below. Snowfall will also lead to visibility of less than a few hundred metres on highest ground and rain will leave glens quite hazy.

Temperature: **Glens:** 2-4C rising 7C and eventually 9C through evening as milder air arrives.
At 800m: Minus 2C rising to plus 3C through evening.
Freezing level: 600-800m rising well above summits later in the day.
